"HEBREW HONEY" HEBREW WORD STUDIES

Introduction: Since there are over 8600 Hebrew words in Strong's Lexicon any attempt at Hebrew word studies is an overwhelming task. As of 2016 there are more than 400 Hebrew word studies but clearly this is a lifelong project (and at age 70 it undoubtedly will never be finished! - it is now 2022 and I am 76 and there are over 1000 Hebrew word studies) The goal of the word studies will be to include Hebrew words that are used in the commentary notes on this website, but they will generally not be discussed in as much detail as the Greek Word Studies. The format will be similar to the Greek and will include the English word first (with most common synonyms), the Strong's number (all Hebrew numbers will begin with a "0" to distinguish from the Greek Strong's numbers) and the transliterated Hebrew word which will serve as the link to the on site definition. You might also try searching preceptaustin.org using the Strong's number (remember to put a zero in front of the Strong's number, not an "H") if you know the number and it is not in this list, as many other Hebrew words have definitions, albeit not in as much detail. Note that the English words are based on the New American Standard translation.
